AluChef™

AluChef: Premium Lightweight Cookware for Professionals

Experience the look of cast iron with a fraction of the weight

AluChef is a high-performance, lightweight cast aluminium casserole pot, weighing just 1/3 to 1/4 of traditional cast iron cookware.

Designed for healthy cooking, AluChef features a durable, PFOA-free non-stick coating, making it both safe and easy to clean.

The exterior boasts a high-heat silicone enamel finish, resistant to stains and perfect for all types of cooking.

Each AluChef pot undergoes rigorous testing, ensuring superior performance. Both the non-stick interior and silicone enamel exterior are independently certified for health, safety, and quality.

Additionally, we test for dishwasher durability, hardness, abrasion resistance, and cross-cut adhesion to ensure it meets the demands of any professional kitchen.

AluChef Gastronorm GN1/1 Pan

Designed for professional buffets, the AluChef Gastronorm GN1/1 pan is the perfect catering solution. Its PFOA-free, durable non-stick coating ensures effortless cooking and easy cleanup.

Compatible with induction and all other cooking methods, the GN1/1 pan is also oven and dishwasher-safe. Plus, it works seamlessly with the EcoServe waterless buffet presentation system, making it an all-in-one option for any catering environment.

Gastronorm Pan Divider

AluChef Gastronorm GN1/1 Pan Divider is a 'first-of-its-kind'.

The pan divider is a removable, water-tight divider designed to work with Gastronorm GN1/1 pan, giving you the ultimate flexibility. It allows you to scale down buffets or serve multiple products in the same AluChef GN1/1 pan.

You can insert multiple pan dividers into AluChef GN1/1 pan which is perfect for corporate catering, canapés and smaller buffets.

Having only one sized pan on offer, the AluChef combination will ensure excellent space savings back of house.

Made from food-grade coated steel and silicone, AluChef GN1/1 Pan Divider can be utilised in temperatures up to 200 °C and is dishwasher safe.

AluChef Ultra Light Cookware

Designed for practicality and safety, AluChef aluminium cookware is perfect for preparing and transporting food in any kitchen or buffet setting. Its lightweight design makes it incredibly versatile and easy to handle.

Significantly lighter than steel and cast-iron alternatives, AluChef cookware offers unmatched functionality without compromising on performance.

Exceptionally Sturdy & Safe

AluChef cookware features a 6.8 mm thick aluminium body, ensuring fast, even cooking across all heat sources, including induction. It's designed to handle everything from stovetop to oven with ease. The non-stick coating, both inside and out, provides excellent anti-stick performance, abrasion resistance, and long-lasting durability. It's also PFOA-free, making it safer and easier to clean, withstanding over 5,000 abrasion cycles.

AluChef casserole pots are compatible with induction and all other cooking methods.

AluChef Miniature Casserole Pots

AluChef miniature casserole pots offer a stylish way to serve a variety of dishes, from baked eggs at breakfast to garlic prawns, soups, potato gratin, or jus.

They are perfect for individual portions at buffets or catered events.

Made from the same high-quality cast aluminium with a durable non-stick surface and silicone enamel coating, these mini pots come in a range of colours, with optional silver or gold handles on the matte black version.

Note: not induction compatible
